

EVERGREEN LOGISTICS & TRANSPORT

Driver & Operations Fleet Handbook

DEGOONY EVERGREEN LOGISTICS & TRANSPORT GH. LTD.

Standardized Training & Field Operations Blueprint

Issued: May 2026

Version: 1.0.0

SECTION 1: EVERGREEN INTRODUCTION & OPERATING PHILOSOPHY

1.1 Introduction

DEGOONY EVERGREEN LOGISTICS & TRANSPORT GH. LTD. (“Evergreen”) is a structured electric mobility and transportation company established to provide disciplined, efficient, safe, and environmentally responsible transport operations in Ghana.

Evergreen was created with the vision of transforming informal transport operations into a professionally supervised and institutionally managed fleet system built on accountability, operational discipline, safety, and long-term sustainability.

Unlike traditional transport systems that often operate without structured supervision or operational controls, Evergreen is designed around:

- Fleet governance
- Operational accountability
- Driver professionalism
- Technology-enabled supervision
- Safety compliance
- Asset protection
- Scalable institutional management

Evergreen combines modern electric mobility solutions with structured operational systems to create a transport model capable of sustainable growth while maintaining strong operational discipline.

1.2 Evergreen Mission

“To build a disciplined, technology-enabled, and professionally supervised transportation system that provides safe, reliable, and sustainable mobility services while creating long-term economic opportunities through structured fleet operations.”

1.3 Evergreen Vision

Evergreen’s vision is to become one of Ghana’s leading institutional electric mobility fleet operators by developing a scalable transportation system built on professionalism, accountability, operational efficiency, and disciplined supervision.

1.4 Evergreen Core Values

All Evergreen operations shall be guided by the following principles:

- **Discipline:** Evergreen operates on strict operational discipline, accountability, punctuality, and compliance with company systems and procedures.
- **Professionalism:** Drivers, supervisors, technicians, and staff are expected to conduct themselves professionally at all times.
- **Safety:** Safety remains Evergreen's highest operational priority for passengers, drivers, pedestrians, and company assets.
- **Accountability:** Every operator within Evergreen is accountable for their actions, operational conduct, and assigned responsibilities.
- **Respect:** Evergreen promotes respectful treatment of passengers, staff, supervisors, authorities, and the public.
- **Operational Excellence:** Evergreen aims to maintain high operational standards through structured supervision, continuous improvement, and proper fleet management.

1.5 Evergreen Operating Philosophy

Evergreen operates on the belief that transportation systems can only become sustainable when they are built on discipline, structure, supervision, accountability, technology, and operational consistency.

Evergreen does not operate as an informal "street transport" system. Instead, Evergreen functions as a structured fleet operation where:

- Vehicles are supervised
- Drivers are monitored
- Remittance systems are controlled
- Operational procedures are standardized
- Technology supports accountability

The Evergreen model is designed to ensure that every vehicle, driver, and operational route functions under clear supervision and measurable performance standards.

1.6 Structured Fleet Culture

Every Evergreen driver and supervisor must understand that:

"Evergreen is not a casual transport operation."

Drivers operating under Evergreen are expected to maintain punctuality, discipline, professionalism, financial accountability, and operational responsibility. The purpose of Evergreen Academy is to help drivers transition from informal operating habits into a structured professional fleet environment.

| 1.7 Technology & Supervision Philosophy

Evergreen integrates operational supervision systems including GPS monitoring, geofencing systems, remote immobilization systems, and centralized operational oversight.

These systems exist to improve safety, protect company assets, support accountability, and improve operational efficiency. Technology is not intended to punish drivers but to create operational discipline, fleet protection, and long-term sustainability.

| 1.8 Evergreen's Long-Term Objective

Evergreen aims to build a scalable transportation institution capable of expanding across multiple operational zones and cities while maintaining strong governance, operational discipline, and structured fleet supervision. The company seeks to create a transportation model that combines modern electric mobility, operational accountability, disciplined supervision, sustainable business practices, and long-term institutional growth.

| 1.9 Evergreen Academy Purpose

The Evergreen Academy exists to train disciplined drivers, standardize operations, improve safety, protect company assets, reduce operational risks, improve customer experience, and strengthen operational culture. Completion of Evergreen Academy training is mandatory before operational deployment.

The Institutional Roadmap

PHASE 1 — MASTER STRUCTURE

We finalize the institutional framework: mission, culture, supervision philosophy, operational discipline, and accountability systems.

PHASE 2 — TECHNICAL & FIELD OPERATIONS

We build: EV technical training, battery management, route procedures, vehicle inspection standards, and emergency procedures.

PHASE 3 — DRIVER GOVERNANCE

We integrate: code of conduct, remittance systems, suspension procedures, evaluation standards, and deployment approval.

PHASE 4 — INSTRUCTOR & TRAINING SYSTEMS

We build: attendance registers, instructor checklists, trainee evaluation forms, deployment certification, and graduation approval process.

PHASE 5 — FINAL INSTITUTIONAL PDF

Then we convert everything into: professional training handbook, printable institutional manual, supervisor edition, and academy edition.

SECTION 2: EVERGREEN CULTURE, PROFESSIONALISM & DRIVER EXPECTATIONS

2.1 Introduction

The success of Evergreen depends not only on vehicles and technology, but also on the conduct, discipline, professionalism, and attitude of its drivers and operational staff. Every Evergreen driver represents the image, reputation, and operational integrity of the company.

For this reason, Evergreen maintains high standards of professionalism, discipline, accountability, and respectful conduct throughout all operations. Drivers and supervisors are expected to understand that Evergreen operates as a structured institutional fleet system and not as an informal or uncontrolled street transport operation.

2.2 Evergreen Professional Culture

Evergreen promotes a professional operational culture based on discipline, punctuality, accountability, operational respect, safety consciousness, professionalism, and teamwork. Every driver must understand that professionalism is a requirement and not an option.

2.3 Driver Conduct Expectations

All Evergreen drivers are expected to report to work on time, dress appropriately, maintain personal hygiene, treat passengers respectfully, obey supervisors, protect company property, avoid conflict, and communicate professionally. Drivers are expected to conduct themselves in a manner that reflects positively on Evergreen at all times.

2.4 Punctuality & Attendance

Punctuality is a core operational requirement within Evergreen. Drivers are expected to report at assigned operational times, attend all required meetings/training sessions, and notify supervisors promptly regarding delays or emergencies. Repeated lateness or absenteeism may result in warnings, suspension, reassignment, or termination recommendations.

2.5 Appearance & Personal Hygiene

Drivers are expected to maintain a clean and professional appearance at all times. Drivers should wear clean clothing, maintain good hygiene, avoid inappropriate dressing, and present themselves respectfully to passengers and the public. A professional appearance improves public trust and customer confidence.

2.6 Passenger Relations & Communication

Evergreen drivers must treat all passengers respectfully regardless of age, gender, religion, nationality, or social status. Drivers are expected to speak respectfully, avoid insults or abusive language, assist passengers

professionally, manage disagreements calmly, and avoid unnecessary confrontation. Passenger complaints may affect deployment eligibility and operational standing.

2.7 Respect for Supervisors & Operational Authority

Evergreen operates under a structured supervision system. Drivers are expected to cooperate with supervisors, comply with operational instructions, participate in inspections, and respond professionally during operational reviews. Disrespect toward supervisors or operational staff may result in disciplinary action.

2.8 Street Operation vs Structured Operation

INFORMAL STREET OPERATIONS	EVERGREEN STRUCTURED FLEET OPERATIONS
Operates entirely without accountability or system tracking.	Continuous operational supervision and performance accountability.
No systematic route or location monitoring.	Active GPS tracking, geofencing, and centralized oversight.
Unstructured and arbitrary daily cash setups.	Standardized, clear, and structured remittance systems.
Lacks performance evaluation or milestones.	Regular performance evaluations and operational reviews.

2.9 Accountability & Responsibility

Every driver is personally responsible for vehicle care, operational conduct, daily remittance, passenger treatment, and compliance with company rules. Drivers may be held accountable for misconduct, negligence, dishonesty, or operational violations.

2.10 Teamwork & Operational Cooperation

Evergreen operations depend on teamwork between drivers, supervisors, technicians, and management. Drivers are expected to cooperate with operational personnel to ensure efficient fleet operations and problem resolution.

2.11 Prohibited Conduct

The following behaviors are strictly prohibited: intoxication during operations, reckless driving, physical confrontation, abusive language, theft or dishonesty, tampering with company systems, unauthorized use of vehicles, unauthorized passenger arrangements, and operational sabotage. Serious misconduct may result in immediate suspension or termination.

2.12 Evergreen Driver Mindset

“Professional transportation operations require discipline, consistency, accountability, and operational respect.”

Drivers who maintain professionalism and discipline may become eligible for long-term deployment, operational trust, leadership opportunities, and future advancement within Evergreen.

2.13 Evergreen Culture Objective

The goal of Evergreen culture is to create a transportation system where passengers feel safe, vehicles are protected, operations remain organized, supervisors maintain control, drivers operate professionally, and accountability becomes standard. Evergreen aims to build a respected institutional transport culture capable of long-term sustainable growth.

SECTION 3: DRIVER CONDUCT, PASSENGER MANAGEMENT & CUSTOMER EXPERIENCE

3.1 Introduction

Passenger experience, public behavior, and driver conduct play a major role in Evergreen's operational reputation and long-term success. Every Evergreen driver represents the company directly during daily operations. For many passengers, the driver is the face of Evergreen. Drivers are therefore expected to maintain professionalism, patience, discipline, and respectful communication at all times.

3.2 Passenger Respect & Professional Treatment

All passengers must be treated respectfully regardless of age, gender, religion, nationality, ethnicity, or social/economic status. Drivers are expected to greet passengers respectfully, communicate calmly, assist passengers appropriately, avoid arguments, and maintain patience during stressful situations.

3.3 Communication Standards

Drivers must communicate clearly, respectfully, and professionally during operations. Drivers should speak politely, avoid offensive language, provide basic passenger assistance when required, and maintain self-control under pressure. Drivers must avoid shouting, threats, or public confrontations.

3.4 Passenger Safety Responsibility

Passenger safety remains a top operational priority within Evergreen. Drivers are expected to operate vehicles safely, avoid reckless driving, obey traffic regulations, avoid excessive speed, and ensure safe passenger boarding and drop-off. Drivers must understand that passenger safety is more important than speed or daily collections.

3.5 Female Passenger Safety Awareness: Evergreen expects all drivers to maintain respectful and professional conduct toward female passengers at all times. Drivers must avoid inappropriate comments, harassment, unwanted physical contact, intimidation, or offensive language. Passenger complaints involving harassment or misconduct may result in immediate suspension pending investigation.

3.6 Conflict Management & De-Escalation

Disagreements may occasionally occur during operations. Drivers are expected to remain calm, avoid emotional reactions, seek peaceful resolution, and contact supervisors when necessary. Drivers must never engage in physical confrontation, threats, aggressive behavior, or retaliation.

3.7 Passenger Complaints Procedure

Passenger complaints shall be taken seriously and handled professionally. Complaints may relate to dangerous driving, rude behavior, overcharging disputes, misconduct, or hygiene concerns. Supervisors may investigate complaints through passenger statements, GPS reviews, operational reports, and driver interviews.

3.8 Public Image & Company Reputation

Drivers must understand that their conduct directly affects Evergreen's reputation, passenger confidence, future business growth, and operational credibility. Every driver is expected to behave in a manner that reflects positively on Evergreen in public at all times.

3.9 Use of Mobile Phones During Operations

Drivers are prohibited from unsafe phone use while operating company vehicles. Drivers must avoid texting while driving, watching videos during operations, and distracted driving behavior. Phone communication should only occur where operationally necessary and safely permitted.

3.10 Substance Abuse Policy

Drivers are strictly prohibited from operating Evergreen vehicles while under the influence of alcohol, narcotics, illegal substances, or intoxicating drugs. Violation of this policy may result in immediate suspension, operational investigation, and termination recommendations. Passenger and public safety cannot be compromised.

3.11 Vehicle Cleanliness & Passenger Environment

Drivers are expected to maintain clean vehicles and professional operating conditions. Drivers should keep vehicles reasonably clean, avoid offensive odors, avoid smoking inside vehicles, and maintain orderly passenger space.

3.12 Handling Difficult Operational Situations

Drivers may occasionally encounter difficult passengers, police stops, traffic disputes, road delays, or operational frustration. Drivers are expected to remain disciplined and contact supervisors where necessary instead of escalating situations emotionally.

3.13 Customer Experience Philosophy

Evergreen believes that professional transportation service involves more than moving passengers from one location to another. Excellent customer experience includes safety, respect, professionalism, reliability, and operational discipline.

3.14 Evergreen Operational Standard

Evergreen aims to build a transportation culture where passengers feel respected, operations remain professional, drivers behave responsibly, public confidence grows, and customer complaints reduce. Professional customer experience is considered a core operational responsibility.

SECTION 4: EV OPERATIONS, BATTERY MANAGEMENT & TECHNICAL DISCIPLINE

4.1 Introduction

Evergreen operates electric mobility vehicles that depend on proper technical handling, disciplined battery management, and responsible operational behavior. Unlike traditional fuel-powered vehicles, electric vehicles (EVs) require drivers and supervisors to understand battery systems, charging procedures, operational monitoring, and energy management practices.

Improper handling of EV systems may lead to operational downtime, reduced battery lifespan, safety risks, equipment damage, or increased operational costs.

4.2 Purpose of Technical Training

The purpose of Evergreen technical training is to ensure that all drivers understand basic EV operations, operate vehicles safely, handle batteries properly, recognize technical faults early, protect company assets, and reduce avoidable equipment damage.

4.3 Supplier Technical Training Partnership

Evergreen may partner with approved suppliers, technicians, and technical professionals to provide operational training for drivers and supervisors. Technical training sessions may include EV system orientation, battery operations, charging procedures, dashboard understanding, technical inspection routines, and operational troubleshooting.

4.4 EV System Fundamentals

Drivers must understand the basic operational components of Evergreen electric vehicles, including electric motor systems, battery systems, controller systems, dashboard indicators, charging systems, lighting systems, and braking systems. Drivers are not expected to perform advanced technical repairs unless specifically authorized.

4.5 Battery Management Philosophy: Battery systems are among the most important operational assets within Evergreen. Improper battery handling may result in reduced battery lifespan, charging inefficiency, operational interruption, safety hazards, and increased replacement costs. Drivers must treat all batteries as critical operational equipment requiring disciplined handling.

4.6 Battery Charging Procedures

Only approved charging procedures and authorized charging systems may be used during Evergreen operations. Drivers and supervisors must follow approved charging instructions, avoid unauthorized charging

methods, report charging abnormalities immediately, and ensure batteries are handled carefully during charging. Unauthorized charging arrangements are strictly prohibited.

| 4.7 Battery Swapping Procedures

Evergreen may operate battery rotation and swapping systems to improve operational uptime and fleet efficiency. Drivers participating in battery swap operations must report battery levels accurately, follow approved swap procedures, handle batteries carefully, return assigned batteries properly, and avoid battery misuse or unauthorized exchanges.

| 4.8 Centralized Battery Support Operations

Evergreen may collaborate with approved suppliers and technical partners operating centralized battery charging facilities. Under such arrangements, charged batteries may be delivered to operational zones, rotated under supervision, and fleet uptime improved through coordinated battery support.

| 4.9 Daily Technical Inspection Procedures

Drivers are required to conduct basic operational inspections before vehicle deployment. Daily inspection items include:

- Battery condition and standard securely mounted state
- Brake functionality and stopping sensitivity
- Tire tread depth, integrity, and operational pressure
- Full lighting systems, signals, and horn operation
- Dashboard indicators, warning icons, and mirror conditions

| 4.10 Fault Reporting Procedures

Drivers are expected to report technical faults immediately. Faults that must be reported include brake problems, battery abnormalities, unusual sounds, dashboard warning indicators, charging issues, steering problems, and lighting failures. Drivers must not ignore technical faults or continue operating unsafe vehicles.

| 4.11 Unauthorized Repairs & Technical Tampering

Drivers are strictly prohibited from unauthorized repairs, tampering with electrical systems, bypassing operational systems, modifying batteries or components, or disconnecting monitoring systems. Only approved technicians may perform repairs. Violation may result in immediate termination.

| 4.12 Energy Management & Operational Discipline

Drivers are expected to operate vehicles responsibly to support efficient battery usage and operational performance. Drivers should avoid unnecessary speeding, reckless acceleration, wasteful energy use, and careless operational behavior. Disciplined driving improves battery efficiency and vehicle lifespan.

4.13 Technical Safety Awareness

Drivers must understand that EV systems involve electrical components that require careful handling. Drivers should avoid unsafe handling of electrical systems, report exposed wiring immediately, avoid water exposure risks, and cooperate with technical personnel during inspections.

4.14 Role of Supervisors & Technicians

Supervisors and technicians are responsible for supporting operational safety and technical compliance. Their responsibilities include vehicle inspection verification, battery monitoring, operational troubleshooting, technical reporting, and maintenance coordination.

4.15 Evergreen Technical Discipline Philosophy

Evergreen believes that proper technical discipline is essential for operational stability, fleet reliability, cost control, asset protection, and long-term sustainability. EV operations require higher technical awareness than traditional systems.

4.16 Evergreen Operational Objective

The goal of Evergreen technical operations is to create a fleet system where vehicles remain reliable, batteries are protected properly, downtime is minimized, maintenance costs are controlled, and operational efficiency remains high.

SECTION 5: DAILY OPERATIONS, REMITTANCE & ACCOUNTABILITY SYSTEM

5.1 Introduction

Evergreen operates under a structured operational and financial accountability system designed to ensure discipline, transparency, operational stability, and long-term sustainability. Daily operations and remittance management form the financial backbone of Evergreen fleet activities. Every driver, supervisor, technician, and operational staff member is expected to understand that operational discipline and financial accountability are essential to the success of the company.

5.2 Evergreen Operational Philosophy

“Consistent operational discipline creates sustainable transportation systems.”

Daily operational procedures exist to ensure organized fleet movement, accountability, revenue protection, asset supervision, operational transparency, and performance consistency.

5.3 Daily Deployment Procedures

Before operational deployment, drivers and supervisors are required to complete approved deployment procedures, including attendance verification, driver assignment, vehicle inspection, battery verification, route allocation, and deployment authorization. No driver may operate a vehicle without supervisor approval.

5.4 Vehicle Assignment & Operational Responsibility

Drivers are responsible for vehicles assigned to them during operational periods. Operational responsibility includes vehicle care, compliance with route instructions, proper operation, battery accountability, remittance submission, and reporting operational incidents. Drivers may not transfer assigned vehicles to unauthorized individuals.

5.5 Shift Operations & Route Discipline

Drivers are expected to operate within approved operational zones and assigned routes. Drivers must follow assigned areas, comply with instructions, maintain communication, and avoid unauthorized deviations. Evergreen utilizes GPS tracking, geofencing, and centralized oversight to monitor compliance.

5.6 Daily Remittance System

The Evergreen remittance system exists to maintain operational accountability, financial discipline, transparent revenue reporting, and fleet sustainability. Drivers are expected to submit required operational remittance honestly and on time according to approved company procedures.

5.7 Commission-Based Operating Structure

Evergreen drivers operate under a performance-based commission system. Driver earnings depend on operational productivity, compliance with company procedures, remittance consistency, attendance and punctuality, and operational discipline. Drivers who consistently fail to meet operational standards may lose deployment eligibility.

5.8 Remittance Verification Procedures

Supervisors are responsible for verifying operational remittance submissions. Verification procedures may include cash reconciliation, operational logs, route reviews, GPS activity reviews, and deployment records.

5.9 Financial Honesty & Operational Integrity

Evergreen maintains zero tolerance for dishonesty, fraudulent reporting, theft, or intentional revenue concealment. Operational dishonesty includes false reporting, hidden collections, manipulated records, unauthorized cash retention, and fraudulent operational claims. Violation results in immediate investigation and termination recommendations.

5.10 Shortages & Operational Review

Where remittance shortages occur, supervisors may conduct operational review procedures. Review procedures include driver interviews, operational activity reviews, GPS reviews, passenger or route verifications, and incident reporting reviews.

5.11 End-of-Shift Procedures

At the end of operational shifts, drivers are expected to complete approved return procedures, including vehicle return inspection, battery return verification, remittance submission, incident reporting, and supervisor review. No shift is complete until all required procedures are finalized.

5.12 Reporting Operational Incidents

Drivers are expected to report all operational incidents promptly. Reportable incidents include accidents, passenger disputes, police stops, technical faults, battery problems, operational delays, and safety concerns. Failure to report may result in disciplinary review.

5.13 Supervisor Accountability Responsibilities

Supervisors play a critical role in maintaining operational discipline and accountability. Supervisor responsibilities include deployment verification, operational monitoring, remittance verification, incident documentation, driver discipline enforcement, and route supervision.

5.14 No-Remittance & Absconding Procedures

Failure to submit required remittance or unauthorized disappearance during operations triggers emergency operational procedures. Evergreen may utilize GPS monitoring, immobilization systems, guarantor contact procedures, operational investigations, and asset recovery procedures.

5.15 Operational Transparency & Record Keeping

Evergreen maintains operational records to support accountability, operational reviews, performance evaluations, financial verification, and fleet supervision. Operational records include deployment logs, remittance logs, inspection reports, supervisor reports, and incident reports.

5.16 Evergreen Accountability Philosophy

Evergreen believes that transportation systems can only remain sustainable when supported by operational discipline, financial accountability, supervision, transparency, and consistent procedures. Every driver and supervisor shares responsibility for protecting Evergreen's operational integrity.

5.17 Evergreen Operational Objective

The goal of Evergreen operational systems is to create a transportation environment where operations remain organized, remittance remains transparent, vehicles remain supervised, accountability becomes standard, operational risks are reduced, and long-term sustainability is protected.

Appendix: Corporate Contact Information

As illustrated on the official corporate asset identification card, please utilize the following formal communication routes for all corporate and operational filings:

Operations Lead:	Jefflean K. Ntow
Contact Number:	+1 (646) 591-3410
Corporate Email:	info@evergreenlogisticsllc.com
